

AMITHA Collection

INTENDED USE: The Amitha collection consists of outdoor metal chairs and stools with classic and elegant lines, particularly suitable for hospitality, public spaces and gardens.

The stackable seat in steel tube has a structure treated for outdoors, with a matte finish. With the addition of practical removable fabric cushions, an excellent level of comfort is achieved even for prolonged use.

MATERIALS UTILIZED: The collection is made entirely of metal. Cushions made of polyurethane foam and upholstered are available as an option.

FINITURE: Slight differences in shades between different surfaces are possible. Furthermore, in the case of products purchased at different times, despite the use of durable materials for use in outdoor environments, climatic-natural factors can cause slight variations in shades. Damage to protected surfaces can cause oxidation and the subsequent appearance of rust, especially in environments with high levels of humidity and salinity.

CLEANING: Metal surfaces in steel and aluminum should be cleaned with a soft, damp cloth soaked in hot water. For stubborn stains, mild liquid soap can be diluted in water in moderation. Always dry after cleaning with a soft cloth. Do not use creams or pastes to clean metals, do not use chlorine, bleach or aggressive detergents. Do not use abrasive pastes or sponges that can scratch metal surfaces.

To clean the fabrics used by Gaber, consult the specific technical data sheet.
