

## CUCARACHA Collection

**INTENDED USE:** The Cucaracha collection of armchairs adapts perfectly to all indoor environments where it is necessary to combine comfort and relax, the armrests integrated into the modern profile of the structure are practical and elegant. Suitable for use in offices, halls, catering or conference spaces.

**MATERIALS UTILIZED:** The collection is made of cold coated polyurethane foam and armrests in integral polyurethane, which can be combined with different types of metal or wooden bases.

**FINISHES:** Slight differences in shades between different surfaces are possible. Furthermore, in the case of products purchased at different times, natural-climatic factors can cause slight variations in shades.

**CLEANING:** To maintain the Gaber's techno-polymer products in perfect conditions trough time and guarantee a long lasting quality of the raw materials we hereby recommend very basic care instructions to be followed. Techno-polymer surfaces usually needs to be cleaned with a normal cloth and warm water; for the most persistent stains a small amount of liquid soap diluted in water may be used. We recommend to strictly avoid all types of abrasive substances, like for example powdered cleaning products, creams, score pads and rough sponges. Gaber's techno-polymer products can be sanitized using different substances, for more information check on the web "Polypropylene chemicals resistance compatibility"; the use of these substances also depends on the temperature, pressure and concentration. It is always a good practice, after sanitizing the techno-polymer products with these substances, rinse immediately the products with water.

Metal surfaces in steel and aluminum should be cleaned with a soft, damp cloth soaked in hot water. For stubborn stains, mild liquid soap can be diluted in water in moderation. Always dry after cleaning with a soft cloth. Do not use creams or pastes to clean metals, do not use chlorine, bleach or aggressive detergents. Do not use abrasive pastes or sponges that can scratch metal surfaces.

Clean the wooden surfaces with a soft, damp cloth soaked in lukewarm water. Dry immediately after cleaning. It is possible to use specific products suitable for cleaning wood, after checking users recommendations.

To clean the fabrics used by Gaber, consult the specific technical data sheet.
