

PLACE Collection

INTENDED USE: Armchair, sofa, small armchairs or modular lounge system make up a collection with an architectural structure in tubular and steel profiles, Place lends itself to creating surprising scenographies in the field of hospitality, public and waiting environments.

MATERIALS UTILIZED: The collection is made of upholstered polyurethane foam and wooden or metal frames.

FINISHES: Slight differences in shades between different surfaces are possible. Furthermore, in the case of products purchased at different times, natural-climatic factors can cause slight variations in shades.

Wood surfaces, being a natural material, could, over time, undergo color changes with use and exposure to light. Moreover, by their nature, these surfaces are uneven and easily damaged: some small impurities and imperfections fall within the accepted quality standards.

CLEANING: Metal surfaces in steel and aluminum should be cleaned with a soft, damp cloth soaked in hot water. For stubborn stains, mild liquid soap can be diluted in water in moderation. Always dry after cleaning with a soft cloth. Do not use creams or pastes to clean metals, do not use chlorine, bleach or aggressive detergents. Do not use abrasive pastes or sponges that can scratch metal surfaces.

Clean the wooden surfaces with a soft, damp cloth soaked in lukewarm water. Dry immediately after cleaning. It is possible to use specific products suitable for cleaning wood, after checking users recommendations.

To clean the fabrics used by Gaber, consult the specific technical data sheet.
