

## TEMA Collection

**INTENDED USE:** The product, intended for indoor use, is suitable for use in the school and learning, office, laboratory and meeting environments.

The product is defined as *Size 6, Blue code, according to the UNI EN 1729-1-2016 standard.*

The innovative Tema chair stimulates collaboration, transition and movement, encouraging interaction between users and supporting the most modern learning methods. The technology used in the product integrates seamlessly into the way you work and study, supporting different styles and collaborative approaches, both analog and digital, all from the comfort of a seat. The modern and practical design, the generous comfort, the elbow rests that support, but leave free space when needed, make it the perfect chair for the classroom.

The Tema seat has a 360 ° swivel seat and a 160 ° adjustable work surface, thus supporting a series of optimal postures and allowing the user to get closer to their work, in full comfort for the whole day.

Large enough to support laptops and mobile devices, the personal work surface, made of materials with high heat and impact resistance, provides a sturdy surface for student materials.

The bridge base allows for easy storage of personal items, freeing the floor from clutter. This storage solution allows users to keep their belongings with them and at the same time facilitate transitions between the various teaching modalities. It is possible to customize the personal work surface with a cup holder and / or with technical support for mobile devices and tablets, making the technology easy to use and at the correct angle, while keeping the work surface free for other class materials. Self-braking product movement wheels are available, which guarantee the maintenance of the position, and therefore the order, of the product not in use. These castors are suitable for use on hard floors.

**MATERIALS UTILIZED:** The collection is made of techno-polymer with metal support and rotation elements.

**FINISHES:** Slight differences in shades between different surfaces are possible. Furthermore, in the case of products purchased at different times, natural-climatic factors can cause slight variations in shades.

**CLEANING:** To maintain the Gaber's techno-polymer products in perfect conditions through time and guarantee a long lasting quality of the raw materials we hereby recommend very basic care instructions to be followed. Techno-polymer surfaces usually need to be cleaned with a normal cloth and warm water; for the most persistent stains a small amount of liquid soap diluted in water may be used. We recommend to strictly avoid all types of abrasive substances, like for example powdered cleaning products, creams, score pads and rough sponges. Gaber's techno-polymer products can be sanitized using different substances, for more information check on the web "Polypropylene chemical resistance compatibility"; the use of these substances also depends on the temperature, pressure and concentration. It is always a good practice, after sanitizing the techno-polymer products with these substances, rinse immediately the products with water.

Metal surfaces in steel and aluminum should be cleaned with a soft, damp cloth soaked in hot water. For stubborn stains, mild liquid soap can be diluted in water in moderation. Always dry after cleaning with a soft cloth. Do not use creams or pastes to clean metals, do not use chlorine, bleach or aggressive detergents. Do not use abrasive pastes or sponges that can scratch metal surfaces.

**DISINFECTING:** Gaber's techno-polymer products can be sanitized using the following list, in where resistance of the techno-polymer is emphasized to these substances on the side.

*Techno-Polymer Chemical Compatibility: depends on temperature/pressure and concentration, important always no abrasive detergents.*

Acetone – Excellent Resistance

Alcohols Ethyl and Methyl- Excellent Resistance

Ammonia – Excellent Resistance

Acqua Regia – Good Resistance, Minor Effect

Bleaching Liquors = Sodium hypochlorite 1% Excellent Resistance - Suitable

Bleach = Sodium hypochlorite 5% - 20° (68°F) Excellent Resistance -Suitable / 60° (140°F) Fair - Not recommended  
Bleach = Sodium hypochlorite 10%-15% - 20° (68°F) Excellent Resistance -Suitable / 60° (140°F) Fair - Not recommended  
Bleach = Sodium hypochlorite 20% - 20° (68°F) Excellent Resistance -Suitable / 60° (140°F) Fair - Not recommended  
Bleach = Sodium hypochlorite 100% - 20° (68°F) Severe effects - Do not use  
Calcium Carbonate - Excellent  
Chlorine Aqueous - Saturated Solution 20° (68°F) Excellent Resistance - Suitable  
Swimming Pool Free Chlorine residual Level: around 1 ppm (mg/l) 20° (68°F) Excellent Resistance - Suitable  
Chloroform - Fair Resistance, moderate effect  
Clorox (Bleach) - Excellent Resistance  
Glycerin - Excellent Resistance  
Sea Water - Excellent Resistance  
Soap Solutions - Excellent Resistance

**WARNING:** This sheet complies with the provisions of the law and of April 10, 1991 n.126 "Rules for consumer information" and with the Decree of February 8, 1997 n. 101 "Implementing Regulation". This article has also passed a series of tests corresponding to the UNI EN 16139 AC: 2013 standard.
